## Glitter UP

Glitter UP galleggiante, grazie alla particolare composizione ed alle dimensioni **190 µm (006)**, può essere direttamente utilizzato per la decorazione di prodotti già colorati (idropitture, decorativi, colori acrilici, stucchi, ecc.). Anche con basse concentrazioni il prodotto risulta perfettamente visibile indipendentemente dal colore del prodotto di base e dalla sua densità.

Argento (art. C1XS) - Oro (art. C2XS).
